

HP Pavilion 14-b120dx Keyboard Replacement

Replace the HP Pavilion 14-b120dx's keyboard.

Written By: Joshua Carberry

INTRODUCTION

If your laptop has sticky keys or a totally malfunctioning keyboard, use this guide to replace the keyboard.

TOOLS:

- [iFixit Opening Tools](#) (1)
-

Step 1 — Battery

 Power down the laptop and detach the charging cord (failure to do so can result in electrical shock).

Step 2

- Flip the laptop upside down so that the bottom is facing you.
- Push the slide on the right toward the center of the laptop, releasing the battery latch.
- Lift the battery up and away from the laptop.

Step 3 — Keyboard

- Insert the plastic opening tool between the keyboard and the palm rest.
 - Pry upwards until the keyboard section detaches from the laptop.
 - Repeat this around the edge of the entire keyboard.
-  Sections will make loud snapping noises as they detach from the palm rest - this is normal.

Step 4

- Lift the keyboard slowly up until the connecting cable is exposed.
- Carefully lift the flap on the ZIF connector using a fingernail or plastic opening tool. This will release the cable.
- Detach the cable.

To reassemble your device, follow these instructions in reverse order.
